LinkedIn | Github | Portfolio

Recent graduate with a keen interest in MERN-based Web development. As a fresher, I bring a strong commitment to learning, adaptability, and a passion for crafting efficient and user-friendly applications. I thrive on challenges and collaboration and am eager to contribute and grow within a dynamic team environment.

TECHNICAL SKILLS

Expertise : React JS | Javascript | React Router Dom **|** HTML5 | CSS3 | Tailwind CSS | Material Tailwind
Comfortable : mongoDB | Express JS | Node JS | JWT | Tanstack Query | Git (Github)
Basic : MUI | Firebase | Stripe | Redux | Socket io

TEAM PROJECT

1. **Fitness Studio (Fitness Tracking web page)**   Live link | Client Code | Server Code | Socket io Code
   Duration : Jan 14, 2024, To Mar 07, 2024
   Features (Implemented by me) :
      1. Users will see the health data from a different and effective corner by updating profiles with health data.
      2. By connecting "Strava" apps to our web page, users can see their "Strava activity" and compare them.
      3. Users can connect with other users by following each other.
      4. By following or as a followed person, a user can chat with another user on live time.
   Technology :
      Frontend : React | Material Tailwind | Axios | Tanstack Query | Email JS | Firebase | Stripe | Redux
      Backend : mongoDB | Node js | Express js | JWT(for securing APIs)
      Others : Socket io

PERSONAL PROJECTS

1. **Mediserve Mobilise (Medical Camp Management)**   Live link | Client Code | Server Code
   Duration : Nov 24, 2023, To Nov 30, 2023
   Features :
      1. Three user roles are implemented in the web page for a user-friendly experience.
      2. Implemented a search bar with tabs in the dashboard to enhance navigation between routes.
      3. Integrated Stripe for secure payment processing for the purchase of medical camps.
   Technology :
      Frontend : React | Router Dom | CSS | Tailwind | MUI | Axios | Tanstack Query | Email JS | Firebase | Stripe
      Backend : mongoDB | Node js | Express js | JWT(for securing APIs)

2. **Blog Vortex (Blog related Web page)**   Live link | Client Code | Server Code
   Duration : Nov 04, 2023, To Nov 09, 2023
   Features :
      1. Empowered logged-in users with the capability to contribute and manage their blogs.
      2. Enables users to comment on any blogs, excluding those they have personally added.
      3. Users can add any blog to their wishlist for reading them in the future.
   Technology :
      Frontend : React | React Router Dom | CSS | Tailwind | Axios | Tanstack Query | Firebase | Framer Motion
      Backend : mongoDB | Node js | Express js | JWT(for securing APIs)
